Mr. Moore,

The letter from your office to me dated May 31, 2017, case # 2017-01-030/Henning. You mentioned you have no authority over tax assessments arrived at by a civil engineers Business Improvement District Report yet the Engineers report is stamped with the State Seal of Professional Engineers. The request to investigate the report I sent you dated June 24, 2016 is a product of the states mandate for a civil engineers report. I would like to know if my request for investigation was reviewed by your office and what conclusions were found. If BID's are just math computations than this should invalidate the BID as no civil engineering was performed. Your response is most appreciated.

Sincerely,

Hi [REDACTED]

Could you please be more specific as to the nature of your concerns with the results of the matter so that I can more appropriately research and address those effectively.

Thank you,

Ric Moore, PLS

Subject: Venice BID engineers report

Mr. Moore

I had sent you a complaint regarding Edward Henning civil engineers report last year. I am told you can clarify the details of your findings. I look forward to your response.

Sincerely,
